FINISH IT RIGHT

Along with the Humbrol paints and varnishes, which all modellers are familiar with, we also carry the Caldercraft range of authentic colours from the Nelson navy period. These water based paints and varnishes are easy to apply and come in matt or satin finish to enable your model to be completed to the highest standard.

We have recently introduced two types of brushes which will give a fine finish to your paint jobs. The first type is Synthetic Sable with a triangular handle. This fits naturally into the hand and will not roll off the workbench. Sizes stocked are 000 – size 4. The manufacturer claims that it will last five times longer than pure sable, retaining a perfect shape.

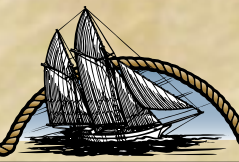

The second type is the Synthetic Sable Flat Brush, great for painting larger areas. Sizes range from 4 – 10. Prices across both ranges are from \$3.95 to \$8.25.

SWIMMING IN A SEA OF PROPS

Another Raboesch order has arrived and we have props coming out our ears.

We have ordered extra quantities of the most popular sizes so we should now have plenty of every size and type.

TYING YOURSELF IN A KNOT

As most of you are aware, the products shown on our website / catalogue are only a very small part of what we have in the shop.

Two of these are our ranges of Caldercraft and Amati rigging cord. These come in both natural and black and can be especially helpful for general building or if there is a need for extra rigging for either a Caldercraft or Amati kit. We have numerous customers who run out of rigging line part way through a model and it is important in those cases that the replacement rigging cord be the same type and colour as the original.

We are therefore moving towards stocking the complete cord ranges of all the leading kit manufacturers, rather than continuing with the generic range which we have stocked in the past.

SHOUT IT LOUD

If you have a special club event coming up and you wish to have it publicised, we would be pleased to include your information and send it out to all the subscribers who receive our newsletter.

Give us as much lead time as possible and then the whole of Australia and New Zealand will know of your event.
